

VAIBHAV JAIN

Open Source | Angular | React | Node | Typescript | Javascript

itsvaibhavjain.com +91 8377044667 vaibhavjain301999@gmail.com [linkedin](#) [github](#)

Summary

Built E-signature modules, B2B SaaS, ERPs, HR & Payroll Systems. Contributing to Open Source. Established AI architecture rules for LLM tools (Claude, Copilot, ChatGPT), improving code correctness

Experience

Open Source & Contract Software Engineer

Feb 2023 – Present

- **Obsidian - Spaced Repetition** - [feat: Enhance review notes sidebar](#)

In large, nested review trees, reviewers struggled to identify overdue and due-today notes. Implemented file/folder level visual indicators, enabling 500k+ users to review notes at a glance.

- **Match Officials**

Manual fee settlement of Referees limited scalability. Developed Rate Charts for fee calculation and implemented 2 way collection / payouts using bill.com APIs. Automated fee calculation reduced around 50 % of helpdesk tickets

SpotDraft

May 2022 – Feb 2023

Senior Frontend Engineer — Angular, Typescript, SCSS, Clean Architecture

Bangalore

- **E-Signature Module** - [workflow demo](#)

Small-screen signing workflows delivered a limited customer experience. Rearchitected the workflow in mobile-first approach, by separating Business logic and UI layer following 'Clean Architecture' guidelines. Strengthened the product's competitive positioning by delivering a modern mobile-device signing experience, impacting 1000+ paid customers.

Unthinkable Solutions

July 2020 – Feb 2022

Full Stack Developer — Angular, React, Typescript, NodeJS, Express, PostgreSQL

Gurugram

- **HR Management System**

Repeated data-table implementations across modules increased development and testing overhead. Built a reusable Angular data-grid from scratch, with configurable columns, cells using parser callbacks (similar to ag-grid). Enabled plug and play adoption across 10+ modules, accelerating feature delivery

Plivo

Jan 2020 – July 2020

Software Engineer — React, Redux, Material UI (MUI)

Delhi

- **In-house UI Library**

Inconsistent UI across application modules. Built a reusable component library(Buttons, Modals, Forms, Dropdowns etc) buit on top of React Material UI aka MUI. Thereby resulting in consistent UI across all modules

Technical Skills

Languages: Javascript, Typescript, HTML5, CSS3, SCSS/SASS, SQL

Architecture: Clean Architecture, Nx Monorepos

Frontend: Angular, React, Astro, Redux, RxJs, NgRx, RESTful APIs, Lazy loading, Angular Material, Bootstrap, MUI, Tailwind, Responsive Web Design, Storybook

Testing: TestBed, Jasmine, Karma, Cypress

Backend: NodeJs, Express.js, Cloudflare Workers, PostgreSQL (knex), REST API development, Authentication (JWT), RBAC

DevOps: Docker, CI/CD (GitHub Actions), Nginx, PM2

Cloud: AWS (EC2, RDS, S3)

Analytics: Datadog, Amplitude

Version Control & Tools: npm, Git, GitHub, Bitbucket, Jira, Trello, Figma, ESLint, Prettier, Husky, Swagger (OpenAPI)

Education

Guru Gobind Singh Indraprastha University

2016 – 2020

Bachelor of Technology in Computer Science

Delhi, India

CGPA — 9.34 out of 10 [University top 10 list]

Achievements

[Outstanding Delivery Award](#)

Nov 2020

Delivered MatchRider in just 4 months, appreciated for aligning with business needs.

[Engineering Impact Testimonials](#)

May 2022 – Feb 2023

Elevated engineering quality by establishing code review and development standards.
