

VAIBHAV JAIN

Frontend Engineer | Full Stack Engineer | Angular | React | NodeJS | ExpressJS | Typescript | Javascript | Open Source

+91 8377044667 vaibhavjain301999@gmail.com [linkedin](#) [github](#) itsvaibhavjain.com

Summary

Frontend Engineer, Fullstack Engineer, Open Source Contributor. Built **B2B SaaS, E-signature modules, HRMS, ERPs** using **Angular, React, TypeScript, and Node.js**. Experienced in **Clean Architecture, design systems**, performance optimization with AI-assisted development - Claude Code, Cursor and ChatGPT. Strong focus on frontend **architecture, reusable systems, and end-to-end ownership**

Experience

Frontend and Full Stack Engineer

Feb 2023 – Present

Open Source / Contract Work

- **Obsidian - Spaced Repetition** - [feat: Enhance review notes sidebar](#)
Built **file/folder-level status indicators** (red / green / blue) using TypeScript and CSS relational **pseudo classes** like :has() for state-driven styling in large nested folder trees. Improved at-a-glance triage of notes for **500K+ plugin users**.
- **Sports League Operation Platform**
Built a **bulk game-import workflow** supporting **500+ games per CSV**, with client-side validation and backend batch processing **using ExcelJS** and convert-excel-to-json, eliminating manual game-by-game entry and reducing import effort.
Owned end-to-end development as a **solo full-stack engineer**, delivering **35+ modules** across Angular, Node.js, Express, and PostgreSQL while managing architecture, client communication, production support, and releases

Frontend Engineer

May 2022 – Feb 2023

SpotDraft

Bangalore

- **E-Signature Module** - [workflow demo](#)
Rearchitected **E-signature workflow** in responsive mobile UI. Created **Abstract Services** for testing. Used **OnPush** change detection for performance. Strengthened the product's competitive positioning by delivering a modern mobile-device signing experience, **impacting 1000+ paid customers**.

Full Stack Developer

July 2020 – Feb 2022

Unthinkable Solutions

Gurugram

- **HR Management System**
Built **In-House Datatable** from scratch with **configurable columns, cells using parser callbacks**. Extensively used **Typescript** for configuration. Enabled **plug and play** adoption across **10+ modules**, accelerating feature delivery

Frontend Developer

Jan 2020 – July 2020

Sellular

Delhi

- **In-house UI Library**
Built a **reusable component library**(Buttons, Modals, Forms, Dropdowns etc) by customizing MUI primitives used **across 30+ screens**. Used **Redux and redux-sagas** pattern for state management and side effect handling

Technical Skills

Languages: Javascript, Typescript, SQL

Frontend: Angular, React, HTML5, CSS3, SCSS/SASS, Astro, Redux State Management, RxJs, NgRx, RESTful APIs, Angular Material, Bootstrap, MaterialUI / MUI, Tailwind, Bootstrap, Responsive Web Design, Storybook, Figma, Accessibility (WCAG)

Backend: NodeJs, Express, PostgreSQL, knex, NoSQL, REST API development, Authentication (JWT), Authorization

Architecture: Clean Architecture, Nx Monorepos. Micro Frontend

Testing: TestBed, Jasmine, Karma, Cypress

Performance: OnPush Change Detection, Lazy Loading, Tree Shaking, zone.js

DevOps: Docker, CI/CD (GitHub Actions), Nginx, PM2

Cloud: AWS (EC2, RDS, S3), Cloudflare Workers

Monitoring: Lighthouse, Datadog, Amplitude

Version Control & Tools: npm, Git, GitHub, Bitbucket, Jira, Trello, ESLint, Prettier, Husky, Swagger (OpenAPI)

Achievements

[Outstanding Delivery Award](#)

Nov 2020

Delivered MatchRider in just 4 months, appreciated for aligning with business needs.

[Engineering Impact Testimonials](#)

May 2022 – Feb 2023

Elevated engineering quality by establishing code review and development standards.

Education

Guru Gobind Singh Indraprastha University

2016 – 2020

Bachelor of Technology in Computer Science

Delhi, India

CGPA : 9.34 out of 10 [University top 10 list]
